

Affirming Yourself for Success

Read these affirmations aloud twice daily to change your life at the subconscious level. This will help to inspire you, keep you focused on your goals, create self change and buffer stress. You can do it!

I create my own life

I show gratitude to others daily

I thank God for my life and those around me

I am focused on and meet my goals

I am building a lasting legacy with my life

I release all limitations

I think better than I feel

I am a great money manager

I think prosperity

I am focused on what I want, not on what I don't want

I am open to receiving and managing wealth

I am becoming someone I never dreamed I can be

I have a gift to monetize and residualize my work

I can start over again

I give thanks all day long

I believe in myself

I love myself and others

I enjoy giving and receiving

I live my life with purpose

Fear and doubt do not control me

I make everyone I know and meet feel important and special

I end my day celebrating my successes

To your success, with love from Nora Ellen at www.WomenStarting.com
